Professional Summary

DevOps Engineer with hands-on experience in AWS, Terraform, Docker, and CI/CD automation. Skilled in deploying scalable applications on AWS ECS Fargate with Infrastructure as Code. Strong foundation in Linux, cloud networking, and monitoring using CloudWatch and Prometheus.

Technical skills

- **Cloud** : AWS (EC2, ECS, S3, IAM, VPC, Route53, CloudFront, ALB, Lambda)
- **CI/CD** : Jenkins, GitHub Actions
- **Containers & Orchestration** : Docker, Kubernetes, ECS
- **Infrastructure as Code** : Terraform
- **Monitoring & Logging** : CloudWatch, Prometheus, Grafana, ELK
- **Version Control** : Git, GitHub
- **Scripting & Programming** : Python, Shell Scripting

Work Experience

SrashtaSoft Technology

December 2024 - May 2026

DevOps Intern

- Managed CI/CD pipelines using Jenkins and GitHub Actions for automated deployments across development, staging, and production environments.
- Administered Linux production servers including deployment management, troubleshooting, monitoring, and incident resolution.
- Containerized and deployed applications using Docker, Nginx, SSL reverse proxy, and AWS infrastructure provisioned with Terraform, ECS Fargate, ALB, Route 53, and CloudWatch.
- Implemented centralized logging, monitoring, and security workflows using ELK Stack, Prometheus, Grafana, and Suricata.
- Collaborated with development teams to resolve deployment failures, infrastructure issues, and environment-specific production problems.

Projects

AI-Powered MCP DevOps Automation Server

- Built AI-driven DevOps automation server using FastAPI and MCP for CI/CD failure analysis.
- Integrated GitHub Actions webhook monitoring with Gemini AI-based log analysis.
- Automated Slack alerts, Jira ticket creation, and Google Sheets incident tracking.
- Developed approval-based remediation workflow with real-time monitoring dashboard.
- Tech: FastAPI, Python, Docker, GitHub Actions, Gemini AI, Slack API, Jira API

Terraform Strapi CICD using ECS Fargate

- Architected and deployed containerized Strapi CMS on AWS ECS Fargate with ALB, PostgreSQL RDS, and CloudWatch monitoring.
- Provisioned AWS infrastructure using Terraform and implemented CI/CD pipelines for automated deployments.

Automated PCAP Analysis Pipeline using AWS & Suricata

- Built event-driven security pipeline using S3, Lambda, Suricata, and Amazon ECR.
- Automated PCAP analysis and centralized security log monitoring using CloudWatch.

Certification

AWS Cloud Technical Essentials - [Verify](#)

Education

B.E. in Computer Science and Technology

LJ Institute of Engineering and Technology | 2022 – 2026
