

# Varun Chavda

## DevOps & Cloud Engineer

+91 95864 21320 | [varunchavda078@gmail.com](mailto:varunchavda078@gmail.com) | [LinkedIn](#) | [github.com/varunchavda078](https://github.com/varunchavda078) | [varunchavda.in](https://varunchavda.in)

### Professional Summary

DevOps Engineer with 1.5+ years of hands-on experience in Linux administration, AWS, Docker, Terraform, Jenkins, and CI/CD automation. Experienced in deploying and maintaining production applications using Docker, Nginx, AWS ECS Fargate, and Infrastructure as Code. Skilled in monitoring, troubleshooting, and building reliable cloud infrastructure.

### Technical skills

- **Cloud** : AWS (EC2, ECS, S3, IAM, VPC, Route53, CloudFront, ALB, Lambda)
- **CI/CD & IAC** : Jenkins, GitHub Actions, Terraform
- **Containers & Orchestration** : Docker, Kubernetes, ECS
- **Monitoring & Logging** : CloudWatch, Prometheus, Grafana, ELK
- **Version Control** : Git, GitHub
- **OS & Scripting** : Linux, Shell Scripting

### Work Experience

#### Junior DevOps Engineer

VedxSolution

July 2026 - Present

- Managed Linux production server hosting multiple web app using Docker, Nginx, PM2, SSL, and reverse proxy.
- Designed and maintained Jenkins CI/CD pipelines for automated deployments.
- Performed server monitoring, log analysis, troubleshooting, backup automation, and resource optimization.
- Collaborated with developers to deploy releases and resolve production issues.

#### Junior DevOps Engineer

SrashtaSoft Technology

May 2025 - May 2026

- Architected and deployed containerized applications using Docker, Nginx, SSL reverse proxy, and AWS services including ECS Fargate, ALB, Route 53, CloudWatch, and Terraform.
- Managed CI/CD pipelines using Jenkins and GitHub Actions while administering Linux production servers, deployments, troubleshooting, monitoring, and incident resolution.
- Implemented centralized logging, monitoring, and security using ELK Stack, Prometheus, Grafana, and Suricata, collaborating with developers to resolve infrastructure and production issues.

#### DevOps Intern

SrashtaSoft Technology

December 2024 - May 2025

- Assisted in deploying applications using Docker, Nginx, and AWS services.
- Supported CI/CD automation using Jenkins and GitHub Actions.
- Assisted with Linux server administration, Terraform, monitoring, and troubleshooting.

### Projects

#### AI-Powered MCP DevOps Automation Server

- Built an AI-powered DevOps automation server using FastAPI and MCP for CI/CD failure analysis.
- Automated GitHub Actions log analysis, Slack alerts, Jira ticket creation, and AI-assisted remediation using Gemini AI
- Tech: FastAPI, Python, Docker, GitHub Actions, Gemini AI

#### Terraform Strapi CICD using ECS Fargate

- Deployed Strapi CMS on AWS ECS Fargate with PostgreSQL RDS using Terraform and automated CI/CD pipelines.

#### Automated PCAP Analysis Pipeline using AWS & Suricata

- Built event-driven security pipeline using S3, Lambda, Suricata, and Amazon ECR.
- Automated PCAP analysis and centralized security log monitoring using CloudWatch.

### Certification

AWS Cloud Technical Essentials - [Verify](#)

### Education

B.E. in Computer Science and Technology

LJ Institute of Engineering and Technology | 2022 – 2026
